## Metabolism of Hematopoietic Stem Cells during Development and Aging

Guest Editor:

**Dr. Tasleem Arif**

Department of Cell,  
Developmental & Regenerative  
Biology, Icahn School of  
Medicine, Mount Sinai, NY 10029,  
USA

Deadline for manuscript  
submissions:

**closed (15 September 2023)**

### Message from the Guest Editor

Metabolic changes impede cellular differentiation and long-term destiny, and they play a crucial role in aging and cancer transformation. The focus of this Special Issue is on the metabolic control of self-renewal and differentiation and how dysregulation, aging, and malignant transformation may occur from disturbed metabolisms. This Special Issue will also include the following: how metabolites impact developmental decisions in hematopoietic stem cells; how mitochondrial and lysosomal function influence stem cell aging, metabolite epigenetic functions, and metabolite signaling roles across stem cells; and the effect of metabolic therapies in aging and diseases. The goal of this Special Issue is to increase collaboration across a variety of fields and, ultimately, to examine how metabolic pathway treatments might influence the aging process.

## Editors-in-Chief

### Prof. Dr. Jukka Finne

Research Programme in  
Molecular and Integrative  
Biosciences, Faculty of Biological  
and Environmental Sciences,  
University of Helsinki, P.O. Box  
56, FI-00014 Helsinki, Finland

### Prof. Dr. Andrés Moya

Integrative Systems Biology  
Institute, University of Valencia  
and CSIC, 46980 Valencia, Spain

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
