Message from the Guest Editor

Dear Colleagues,

Research during the last few decades has revealed a wide repertoire of functions in which the ventral hippocampus is profoundly involved, including social memory, anxiety, context-dependent fear, and decision making. Furthermore, the ventral hippocampus is preferentially involved in depression, schizophrenia, epilepsy, and autism. Comparisons between the two extreme segments of the hippocampus, i.e., the ventral and dorsal, have revealed notable features of an intrinsic ventral hippocampus circuit, including increased excitability, narrower range of activity-dependent synaptic plasticity, and relatively high levels of several neuromodulators.

Therefore, elucidating the details of this organization will gradually contribute to the understanding of how this organization supports ventral hippocampus-dependent functions. Furthermore, revealing the mechanisms underlying the specific roles that the ventral hippocampus plays in neurological, psychiatric, and neurodevelopmental disorders will advance our ability to design new therapeutic strategies for the treatment of disorders involving the ventral hippocampus.

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
