## Specialized Pro-resolving Mediators (SPM) in Health and Disease

Guest Editor:

**Prof. Dr. Zahi Badran**

Periodontology Unit, College of  
Dental Medicine, University of  
Sharjah, Sharjah 27272, United  
Arab Emirates

Deadline for manuscript  
submissions:

**closed (30 April 2022)**

### Message from the Guest Editor

Specialized pro-resolving mediators (SPM) are a group of lipid mediators (lipoxins, resolvins, protectins, and maresins). The discovery of the SPM family has led to an advancement in our understanding of inflammatory diseases, such as periodontal diseases or arthritis and many other inflammation-related diseases. SPM have been found to initiate the resolution of inflammation and thus restore the inflammatory homeostasis. The latter is crucial to maintaining health and protective immunity. Hence, SPM are considered novel promising immune-resolvent agents, they can potentially be biomarkers of health and risk indicators in many diseases, and play roles in controlling biofilm formation and enhance antibiotic activity.

This Special Issue will welcome all research related to SPM detection and dosage in health or disease states. It will also welcome all research on the use of SPM molecules as therapeutic agents in any inflammatory disease. Original scientific reports, review articles, commentary, and perspective papers are accepted.

## Editors-in-Chief

### Prof. Dr. Jukka Finne

Research Programme in  
Molecular and Integrative  
Biosciences, Faculty of Biological  
and Environmental Sciences,  
University of Helsinki, P.O. Box  
56, FI-00014 Helsinki, Finland

### Prof. Dr. Andrés Moya

Integrative Systems Biology  
Institute, University of Valencia  
and CSIC, 46980 Valencia, Spain

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
