### Message from the Collection Editors

Dear Colleagues,

Plants live in ever-changing environments that are often unfavorable for growth and development. Abiotic stresses such as salinity, drought, extreme temperature, metal stress and nutrient deficiency severely inhibit plant production, hindering agricultural production and threatening food security globally. Moreover, climate change and poor management options have further worsened the situation. Plants can sense stress signals and respond quickly to these adverse conditions through regulating their molecular, physiological, metabolic and developmental responses. A large number of signaling molecules participate in these processes, exhibiting intricate interactions. Understanding the possible mechanisms and signaling transduction underlying this process, combined with the advancement of genome-editing technologies, can help translate these findings into commercial outputs.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Jukka Finne

Research Programme in  
Molecular and Integrative  
Biosciences, Faculty of Biological  
and Environmental Sciences,  
University of Helsinki, P.O. Box  
56, FI-00014 Helsinki, Finland

### Prof. Dr. Andrés Moya

Integrative Systems Biology  
Institute, University of Valencia  
and CSIC, 46980 Valencia, Spain

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
