Deadline for manuscript submissions:  
**closed (31 August 2023)**

### **Message from the Guest Editors**

Microbial processes are capable of converting renewable resources into chemicals of industrial interest. Maximization of the carbon yield from the substrates to the target product is difficult to achieve due to the competition or conflict between cell growth and bioproduction. Metabolic reprogramming has been pursued by taking advantage of metabolic engineering and biotechnologies to overcome the metabolic bottleneck in product synthesis for the improvement of production.

In this Special Issue, we hope to provide an extensive exploration of microorganism and biotechnology for bio-based chemical biosynthesis. The scopes of this Special Issue include the construction of microbial cell factories for product or recombinant protein production, biological transformation of industrial interest, new genome editing methods or dynamic regulation systems and other aspects of genetic transformation for strain improvement. We aim to publish papers in this Special Issue that represent important advances of significance to specialists within industrial microorganism and biotechnology fields.

Prof. Dr. Tingyi Wen

## Editors-in-Chief

### Prof. Dr. Jukka Finne

Research Programme in  
Molecular and Integrative  
Biosciences, Faculty of Biological  
and Environmental Sciences,  
University of Helsinki, P.O. Box  
56, FI-00014 Helsinki, Finland

### Prof. Dr. Andrés Moya

Integrative Systems Biology  
Institute, University of Valencia  
and CSIC, 46980 Valencia, Spain

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
