## Neurodegenerative Diseases: Molecular Mechanisms and Therapeutic Applications

Guest Editors:

**Prof. Dr. Xinhua Shu**

Department of Biological and Biomedical Sciences,  
Department of Vision Science,  
Glasgow Caledonian University,  
Glasgow G4 0BA, Scotland, UK

**Prof. Dr. Zhiming He**

School of Basic Medical Sciences,  
Shaoyang University, Shaoyang,  
Hunan 422000, China

**Prof. Dr. Mustafa Naziroglu**

Department of Biophysics,  
Faculty of Medicine, Suleyman  
Demirel University, Morfoloji  
Binasi, Cunur, 32260 Isparta,  
Turkey

Deadline for manuscript  
submissions:

**closed (31 October 2022)**

### Message from the Guest Editors

Neurodegenerative disease is a group of heterogeneous neural disorders, characterized by the progressive dysfunction and death of neurons. Most neurodegenerative diseases are complex diseases, associated with both genetic and environmental factors. Major neuron death pathways include apoptosis, necroptosis, pyroptosis and ferroptosis. Accumulated data from in vitro and in vivo studies suggest that oxidative stress, endoplasmic reticulum (ER) stress and inflammation contribute to neuron loss. A number of small chemicals and natural products have shown therapeutic potential for neurodegenerative diseases, while cell replacement and gene therapy have shown promise for certain types of condition. However, a more comprehensive understanding of the pathogenesis and the development of new strategies for their treatment are urgently needed.

The purpose of this special issue is to collect recent developments in the elucidation of the pathophysiology of different neurodegenerative diseases and in the appraisal of therapeutic options. It provides an opportunity for researchers in the field to submit their invaluable studies. We look forward to receiving your contribution.

## Editors-in-Chief

### Prof. Dr. Jukka Finne

Research Programme in  
Molecular and Integrative  
Biosciences, Faculty of Biological  
and Environmental Sciences,  
University of Helsinki, P.O. Box  
56, FI-00014 Helsinki, Finland

### Prof. Dr. Andrés Moya

Integrative Systems Biology  
Institute, University of Valencia  
and CSIC, 46980 Valencia, Spain

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
