Medicine and Medical  
Biotechnology, School of  
Medicine, University of Naples  
Federico II, Naples, Italy

**Dr. Alexandros Makis**

1. Pediatric Hematology Unit,  
Department of Pediatrics,  
University Hospital of Ioannina,  
45500 Ioannina, Greece  
2. Faculty of Medicine, School of  
Health Sciences, University of  
Ioannina, 45500 Ioannina, Greece

Deadline for manuscript  
submissions:

**closed (20 July 2023)**

### Message from the Guest Editors

The thalassemia syndromes are among the most common human monogenic disorders worldwide. Historically, since the early, pioneering studies, thalassemia research has always provided inspiring lessons for discovering the complex processes and the variety of the structural elements involved in the regulation of gene expression as well as for exploring the molecular bases and the inheritance mechanisms of other human diseases. However, despite the impressive body of knowledge gathered in these decades, there is still a need for further studies in molecular genetics and clinical management that could contribute to define more effective prevention programs and support the development of novel drugs and more successful and affordable gene-therapy strategies.

The purpose of this Special Issue is thus to provide novel insights and perspectives into this continually evolving topic that in the future could lead to a definitive and affordable cure for these disorders. We also hope that the research described herein can be a source of inspiration to the readers for further studies in this fascinating and not yet fully explored field.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Jukka Finne

Research Programme in  
Molecular and Integrative  
Biosciences, Faculty of Biological  
and Environmental Sciences,  
University of Helsinki, P.O. Box  
56, FI-00014 Helsinki, Finland

### Prof. Dr. Andrés Moya

Integrative Systems Biology  
Institute, University of Valencia  
and CSIC, 46980 Valencia, Spain

## Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)
