Genetics and Pathways Underlying Chronic and Age- Related Disease

Message from the Guest Editor

Chronic and age-related diseases are important challenges facing healthcare providers. While there is an increasing understanding of the pathways that underlie ageing processes, and hence the susceptibility to disease, there are clearly pathways and variants that result in or contribute to the development of specific diseases. Some chronic diseases may simply be the result of cumulative damage, but it is clear that ageing can affect the development of disease, either directly or indirectly. To fully understand the effect of ageing and to identify potential pathways for intervention and disease treatment, we must study individual diseases as well as ageing itself. In this Special Issue, we will highlight patient and model studies investigating chronic and age-related disease, and their relationship to ageing.

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
