

Special Issue

Biological Foundations of Psychiatric Disorders

Message from the Guest Editor

The study of psychiatric disorders requires a multidisciplinary approach, drawing from molecular genetics, neurobiology, cellular biology, and behavioral science. New tools, including genome-wide association studies, single-cell RNA sequencing, and animal models, are enabling detailed insights into the cellular and molecular bases of these complex conditions. These approaches are crucial for identifying biomarkers, uncovering sex-specific differences, and assessing novel therapeutic targets. To support these advancements, we invite submissions for our Special Issue, "Biological Foundations of Psychiatric Disorders". We welcome original research, data/bioinformatics papers, hypotheses and opinions, reviews, protocols, and brief communications that deepen our understanding of psychiatric disorders from a molecular and cellular perspective. Topics of interest include the following:

- Genetic associations and genome-wide studies;
- Sex-specific molecular and cellular differences;
- Therapeutic discovery and innovative interventions;
- Development and application of animal models;
- Behavioral studies relevant to psychiatric conditions;
- Tools and techniques for psychiatric research.

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
