Mechanisms of Drug Resistance in Cancer Cells

Message from the Guest Editors

Drug resistance is a significant challenge in anti-cancer treatments, driven by genetic, epigenetic, proteomic, metabolic, and microenvironmental factors. These mechanisms allow certain cancer cells to survive and proliferate under hostile conditions, reducing the effectiveness of current therapies. Existing strategies, including new drug discovery, combination therapy, and precision immunotherapy, remain insufficient in overcoming drug resistance. Understanding these mechanisms is crucial for developing advanced therapeutic options and more potent, target-based drugs. This Special Issue aims to explore and understand the molecular mechanisms of drug resistance in cancer cells and to highlight emerging therapeutic options with the potential to better address this problem. We welcome original research articles and reviews in areas such as factors contributing to drug resistance, novel approaches to overcoming resistance, the role of immunity and immune targets, mechanisms of apoptosis evasion, and the impact of microRNAs and lncRNAs on drug resistance.

About the Journal

Message from the Editorial Board

A major strength of biological science is the diversity of approaches that biological scientists apply to their research problems. *Biology* reflects this diversity and brings together studies employing the varied experimental and theoretical approaches that are fueling biological discovery. *Biology*, the journal, is a fully peer-reviewed publication with a rapid and economical route to open access publication and is listed on PubMed. All articles are peer-reviewed and the editorial focus is on determining that the work is scientifically sound rather than trying to predict its future impact.

Editors-in-Chief

Prof. Dr. Jukka Finne

Research Programme in Molecular and Integrative Biosciences, Faculty of Biological and Environmental Sciences, University of Helsinki, P.O. Box 56, FI-00014 Helsinki, Finland

Prof. Dr. Andrés Moya

Integrative Systems Biology Institute, University of Valencia and CSIC, 46980 Valencia, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (General Agricultural and Biological Sciences)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.4 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2024).
