

Special Issue

Innovative Systems for Biomass Crop Production and Use

Message from the Guest Editors

This issue focuses on emerging technologies, systems, and approaches that contribute to the production and utilization of biomass crops, such as switchgrass, hemp, miscanthus, and other annual and perennial crops, that can be grown in a field and mechanically harvested. Suitable topics include new crops, cropping systems and strategies, innovative harvest and processing approaches and technologies, opportunities for "smart ag" in biomass production, emerging applications for end uses of biomass crops, and developments in economic performance and sustainability assessment. You are cordially invited to submit a manuscript for publication in a Special Issue of the journal *Biomass*, devoted to the topic of "Innovative systems for biomass crop production and use". Articles should consist of new research or critical review of emerging topics in this field. *Biomass* is an open access, peer reviewed journal, which will afford wide visibility of your work and an efficient review and publication process.

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.3 days after submission; acceptance to publication is undertaken in 7.7 days (median values for papers published in this journal in the first half of 2026).

Journal Rank:

JCR - Q1 (Engineering, Chemical) / CiteScore - Q1 (Forestry)
