Performance, Sports Center,
Federal University of Santa
Catarina, Florianopolis 88040-
900, Brazil

Deadline for manuscript
submissions:

closed (31 October 2023)

Message from the Guest Editors

Obesity and hypertension are non-communicable diseases with high prevalence in the population and responsible for morbidities, death, and a considerable increase in the cost of health systems worldwide. Multiple factors are responsible for the emergence of obesity and hypertension, such as a diet rich in ultra-processed foods, inadequate sleep, stress, physical inactivity, and genetic and environmental factors. This Special Issue aims to disseminate knowledge about factors related to obesity or hypertension, but also to disseminate knowledge about treatment strategies (drug or non-drug) to combat the reduction in health risks that are related to obesity and hypertension. In this sense, studies that have investigated the determinants, correlates, and/or measures of obesity or hypertension in different population subgroups (children, adolescents, adults, older adults, populations with disease diagnoses) are welcome. Original research and review articles are welcome for submission to this Special Issue, which intends to publicize the area of obesity and hypertension.

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPlus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
