Advanced Research in Thyroiditis: From Clinical Presentation to a Multidisciplinary Approach

Guest Editors:

Dr. Mara Carsote

1. Department of Endocrinology, Carol Davila University of Medicine and Pharmacy, 050474 Bucharest, Romania
2. Department of Endocrinology, C.I. Parhon National Institute of Endocrinology, 011863 Bucharest, Romania

Dr. Claudiu Nistor

1. Department 4—Cardio-Thoracic Pathology, Thoracic Surgery II Discipline, Faculty of Medicine, “Carol Davila” University of Medicine and Pharmacy, Bucharest, Romania
2. Thoracic Surgery Department, “Dr. Carol Davila” Central Emergency University Military Hospital, 013058 Bucharest, Romania

Deadline for manuscript submissions:

closed (31 July 2023)

Message from the Guest Editors

The field of thyroiditis varies from acute to subacute and chronic forms. While majority of cases involve endocrinology practice, a strong link is related to different imaging techniques, infectious diseases, genetic background, and endocrine surgery in selected cases. Also, particular aspects involve pediatric population and pregnant women. We aim to provide a complex, multidisciplinary approach concerning different aspects of thyroiditis. We invite you to contribute to one or several papers (original study or review). We are particularly interested, but not exclusively, to: advanced research of pathogenic mechanisms; data on particular aspects like amiodarone – induced thyroiditis; overlapping disorders like Basedow-Graves’ disease and thyroid cancer, including primary lymphoma; surgical intervention on acute/suppurative cases and/or those with synchronous thyroid malignancies, new categories amid recent COVID-19 pandemic; Riedel’s thyroiditis; painless thyroiditis; correlations with cytological report, core biopsy data; new molecular and immunohistochemistry biomarkers; long term assessment of antibodies assays; poly-glandular autoimmune syndromes.

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPlus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
