Department of Pediatrics, Fujita Health University, Toyoake, Japan

Deadline for manuscript submissions:

closed (29 February 2024)

## **Message from the Guest Editor**

We are pleased to announce the production of a Special Issue on Kawasaki disease. This issue will focus on the latest research findings and developments pertaining to Kawasaki disease, including topics such as micro RNAs, cytokine profiles in serum and urine, electrophysiology such as HR variability, QTc and QT dispersion.

Kawasaki disease is a systemic vasculitis with unknown etiology that especially affect coronary arteries, potentially leading to the development of coronary artery aneurysms. We would like to focus on the pathophysiology of these vasculitis with respect to microRNAs and cytokines and also wish to establish an exact diagnosis through the help of various elements of electrophysiology.

We invite submissions in the form of original research articles and reviews that address these topics and will help to advance our understanding of Kawasaki disease.

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research. biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to Biomedicines, be it original research, review articles, or developing Special Issues of current key topics.

#### **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
