Message from the Guest Editor

Wound healing in general is a complex but normal physiological process. However, due to multiple underlying diseases, it can be problematic, leading to, e.g., chronic wounds, which are associated with high patient morbidity and high costs of wound care. Many different strategies have been developed to deal with this problem, rendering wound healing an emerging field in today's scientific landscape.

This Special Issue addresses a broad spectrum of research in wound healing, from in vitro and in vivo experiments including the field of tissue engineering, to clinical studies and therapeutic applications. Original research articles as well as review articles are highly appreciated.

- wound healing
- clinical research in wound healing
- in vitro experiments in wound healing
- in vivo experiments in wound healing
- cytokines in wound healing
- chronic wounds
- pressure sores/ulcers
- scar formation

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
