Regulators of Cancer Metastasis

Guest Editors:

Dr. Sanjib Chaudhary

Department of Biochemistry and
Molecular Biology, University of
Nebraska Medical Center,
Omaha, NE 68198, USA

Dr. Julio C. Valencia

Cancer Innovation Laboratory,
Center for Cancer Research,
National Cancer Institute,
Frederick, MD 21702, USA

Deadline for manuscript
submissions:

closed (29 February 2024)

Message from the Guest Editors

Dear Colleagues,

Metastasis, the intricate process by which tumor cells spread from their primary site to distant organs, poses a critical challenge in cancer research. We invite scientists, clinicians, and researchers to contribute original research articles, comprehensive reviews, and insightful case studies that explore various facets of metastasis regulators. Topics of interest include, but are not limited to, the following:

1. Epithelial–mesenchymal transition (EMT) and its pivotal role in initiating invasion and dissemination.
2. Matrix metalloproteinases (MMPs) and their impact on extracellular matrix degradation during metastatic progression.
3. Angiogenesis and lymphangiogenesis as facilitators of tumor vascularization and metastatic niche establishment.
4. Cancer stem cells and their contribution to therapy resistance, tumor relapse, and metastatic potential.
5. Immune system modulation of metastasis, encompassing both immune surveillance and immune cell promotion of spread.
6. Impact of immunotherapy on metastasis response and toxicity.

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
