Deadline for manuscript
submissions:

closed (30 November 2020)

Message from the Guest Editor

The beneficial effects of adipose tissue transplantation in the field of obesity and associated metabolic disorders recently emerged. Efficient processes for the browning of human subcutaneous and visceral adipose tissues *ex vivo*, the best site for their transplantation, and the identification of critical secreted factors and non-cell components in the therapeutic potential of emulsified tissues from different fat depots remain to be identified.

This is a non-exhaustive list of examples and this Special Issue in *Biomedicines* is open to recent advances in the use of adipose tissues in medicine.

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
