Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editor

In the last few years, knowledge on the landscape of molecular alterations in human disease has been rapidly expanding, and some genetic features have proven to be more prognostically informative than clinical or histopathological ones. Nonetheless, the understanding of the genetic and epigenetic features of human disease is still at the beginning, and their diagnostic, prognostic and predictive relevance mostly remains to be clarified.

This Special Issue encourages scientists to submit results that have potential for application in human disease, and research obtained from human experimentation or animal models with the potential to shed light on the underlying causes of human diseases, including cancer, to develop future human medicines, medical devices and diagnostics.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
