Message from the Guest Editor

Dear Colleagues,

For this Special Issue, we invite clinical studies focusing on the following:

1. Neurosurgical advancements in intraoperative neurophysiological monitoring or tumor identification.
2. Therapeutic approaches in brain tumor management, including but not limited to radiation therapy, chemotherapy, targeted therapy, or immune therapy.
3. Novel therapeutic approaches to overcome the limitations of current modalities in both non-malignant and malignant brain tumors.

Authors are invited to submit original research and review articles.

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.
