Deadline for manuscript  
submissions:

**closed (31 March 2023)**

### Message from the Guest Editors

The year 1991 represents a crucial year for the human immunodeficiency virus (HIV) and the acquired immunodeficiency syndrome (AIDS) epidemic. In June of that year, the Center for Disease Control (CDC) reported two clusters of rare diseases, *Pneumocystis carinii* pneumonia and Kaposi's Sarcoma, respectively, which mostly affected gay American men, previously healthy.

Since then, the scientific community has been tirelessly devoted to investigating etiopathogenesis, diagnosis, prevention and treatment, achieving important successes.

Most patients show at least one mucocutaneous HIV/AIDS-related manifestation in their clinical history; it often occurs at the early onset of the infection and correlates with the immunologic stage and the use of highly active antiretroviral therapy (HAART).

We kindly invite clinical and basic researchers to submit original research, review or expert opinion articles about pathogenesis, diagnosis and treatment of HIV/AIDS, with a particular focus on skin and oral disorders.

## Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
