

Immunogenetic Regulations for Disease Prognosis

Guest Editors:

Dr. Anshuman Mishra

Translational Research & Sustainable Healthcare Management, Institute of Advanced Materials, IAAM, 590 53 Ulrika, Sweden

Dr. Trim Lajqi

Department of Neonatology, Heidelberg University Children's Hospital, Heidelberg, Germany

Deadline for manuscript submissions:

28 February 2025

Message from the Guest Editors

Gaining insight into immunogenetic regulations is critical to further our understanding of the operation of the immune system at the molecular and cellular levels, devise personalized medicine strategies, and develop vaccines and therapies that are more efficacious against a wide range of immune-related ailments.

This Special Issue features contributions to the field that enable in-depth research on drug effects and the mechanisms underlying disease progression, including advances in clinical biomarkers, regenerative medicine, microscopic techniques, heterologous gene expression, organ transplantation and multi-omics profiles. This Special Issue focuses on immune systems and their relationships to innovation, emerging technologies, natural medicine and the environment in order to present conceptual and practical advances regarding the state-of-the-art research on molecular and cellular mechanism. In order to create methods for early disease detection, real-time monitoring and prevention, it is intended to promote interest and research in this fascinating area.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPlus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
