Message from the Guest Editors

Dear Colleagues,

Endothelial cells secrete numerous proinflammatory cytokines in response to injury, contributing to healing. This process is necessary for the proper functioning of the organism. However, it is also observed during the development of disease. Vascular activation is crucial to tumorigenesis via cancer neovascularization.

For this Special Issue, we welcome papers that focus on the function of ECs in diseases to improve the knowledge of the mechanisms regulating ECs-related pathologies, and to focus on the potential therapeutic role of endothelium. Original articles and reviews will be considered for publication in this Special Issue.

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))
