Message from the Guest Editor

The rapidly developing area of BCR-ABL negative chronic myeloproliferative neoplasms (MPN) and myelodysplastic syndromes (MDS) is profoundly affected by novel therapeutic and conceptual advances, as well as by the COVID-19 pandemic. In addition to the progressive nature of these entities and the risk for leukemic transformation and death due to bone marrow failure, these patients experience high cardiovascular disease burden and substantial risks of thrombosis and bleeding. Other aspects of these diseases, such as chronic renal disease and autoimmune disorders, as well as the mutual relationship with chronic systemic inflammation and cancer, are also emerging, implying that these patients might represent the human model for inflammation and cancer.

The aim of this special issue is to collect articles that investigate novel and contemporary issues in the context of MPN and MDS. Manuscripts covering all aspects of research related to MPN and MDS as well as review articles focused on important novel topics are welcome.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
