Engineering, Central South
University, Changsha, China

Deadline for manuscript
submissions:

closed (31 January 2024)

Message from the Guest Editors

Dear Colleagues,

Millions of people are affected by neurological disorders. Patients with this condition have lots of limitations impacting not just their life but also their caregivers. Early detection of the condition can be improved with the help of Artificial Intelligence (AI) based techniques. AI is having a disruptive and transformative effect on clinical medicine. For neurology and neurobiology, there have been increasing interests in developing models and tools to address the complex patterns of connectivity in brain tissue. This special issue focuses on current AI-driven approaches to clinical neuroscience and an assessment of the associated key methodological and ethical challenges. The fundamentals of AI in neurobiology and neurology, its applications and use cases in various areas of neurobiology and neurology and how AI-based algorithms can transform the management of neurological diseases will be favored. Research implications, novel methods involving deep learning models, AI-based neuroimaging using brain scans to detect neurological disease will be highlighted.

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))
