Valencia, E46010 Valencia, Spain

Deadline for manuscript  
submissions:

**closed (15 November 2022)**

### Message from the Guest Editor

Drugs are bioactive compounds that were originally discovered in the chemical structures that are present in both the plant and animal kingdoms. Both organic and inorganic compounds have been used empirically to cure diseases or to treat the symptoms that are derived from them. Much of modern pharmacology has its origins in these types of compounds. Due to advancements in chemistry, we are able to characterize the chemical composition of any compound with a high degree of accuracy. In fact, we are continuing to discover new compounds in nature that demonstrate very promising pharmacological activities, which could lay the foundation for new, more efficient, and more effective bioactive molecules through chemical modifications. Furthermore, pharmacology is advancing, as new synthetic compounds with increasingly specific and effective pharmacological properties are being developed at a rapid pace. Therefore, in this Special Issue, we plan to collect the latest advances in new drugs of either natural or synthetic origin in addition to describing their biological targets, their specific mechanisms of action, and their effective dosages.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPUS / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (*Pharmacology & Pharmacy*) / CiteScore - Q2 (*Medicine (miscellaneous)*)
