Message from the Guest Editors

Dear Colleagues,

Telocytes (TC) are found in many tissues and are mostly located in interstitial layers of organs, and have been identified in many vertebrates. Recent advances have also suggested the presence of telocytes in invertebrates and fishes. This cell system has been reported as ubiquitous in mammals and interpreted as an important player in innate immunity and tissue regeneration, also contributing to the maintenance of local tissue homeostasis. Telocytes are strategically located in between blood vessels, and close to nerve endings and interstitial cells. Furthermore, TCs appear to be part of stem cell (SC) niches in several organs, such as gut, skeletal muscle, heart, lung, and skin. Increasing evidence suggests a possible implication of TC in regulating the activity of tissue-resident SCs and shaping the SC niche microenvironment, thereby contributing to tissue renewal and repair. Recent evidence shows the involvement of TC in pathology. However, there are still key unanswered questions about these interesting cells. Telocyte research is an exciting field in which we can obtain a better understanding of the mechanisms involved in tissue development and homeostasis.

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
