Deadline for manuscript
submissions:

closed (31 December 2023)

Message from the Guest Editor

The observation of tumor vasculature dates back to ancient times. The main topics are as follows:

1. Tumor endothelial cells heterogeneity and its impact on tumor angiogenesis and vasculogenesis.
2. Molecular characterization of cells initiating tumor vasculogenesis.
3. New innovative experimental models for the study of tumor angiogenesis and vasculogenesis.
4. Chemotherapy and radiotherapy as friends or foes of tumor angiogenesis and vasculogenesis.
5. Malignant cells involvement in tumor vasculogenesis.
6. Tumor stroma immune microenvironment and its modulation related to tumor angiogenesis and vasculogenesis.
7. New radiologic research techniques for in vivo study of tumor angiogenesis and vasculogenesis and for targeting tumor vessels.
8. Nanotechnology, tumor angiogenesis and vasculogenesis.
9. Artificial intelligence, tumor vasculogenesis and angiogenesis.
10. Pathologist role in the assessment of tumor angiogenesis and vasculogenesis by conventional immunohistochemistry and digital image analysis and its impact on initial preliminary diagnosis.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
