

Molecular Research in Infectious Diseases

Guest Editors:

Dr. Amedeo Amedei

Department of Experimental and
Clinical Medicine, University of
Florence, Florence, Italy

Dr. Irena Mladenova

Faculty of Medicine, Trakia
University, Stara Zagora, Bulgaria

Deadline for manuscript
submissions:

closed (31 August 2023)

Message from the Guest Editors

Dear Colleagues,

The basic molecular research in infectious diseases is the root for revealing the general features of occurrence and spread of the diseases in human society: causes, conditions, mechanisms of development. In addition, the molecular epidemiology is a promising field in the development of medical science, especially in revealing the transmission mechanisms of infectious agents in outbreaks and epidemics of infectious diseases. The molecular epidemiological methods are essential for general medical science, for the study of risk factors determining infectious human pathology, especially infectious agents with oncogenic potential.

We are happy to announce this Special Issue of Biomedicines entitled “Molecular Research in Infectious Diseases” and look forward to receiving your reviews or original research articles.

Dr. Amedeo Amedei

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPlus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
