

Endothelial Dysfunction: From a Pathophysiological Mechanism to a Potential Therapeutic Target

Guest Editor:

Dr. Pasquale Ambrosino

Istituti Clinici Scientifici Maugeri
IRCCS, Pavia, Italy

Deadline for manuscript
submissions:

closed (15 January 2022)

Message from the Guest Editor

This Special Issue will focus on the mechanisms and diagnosis, as well as the prognostic and therapeutic implications, of endothelial dysfunction as a biomarker of inflammation, oxidative stress and vascular disease. The Special Issue is open for both basic and preclinical research, or for omics-based and translational approaches, and will cover original articles as well as reviews.

Dr. Pasquale Ambrosino

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Medicine (miscellaneous))
