Message from the Guest Editor

Dear Colleagues,

The scope of this Special Issue is to cover recent progress in nanotechnology/biotechnology as it relates to nanomedicine, targeted delivery of medicines and biomedicines, diagnostics. A key aim is to bring latest advances of various nanomedicine approaches for the detection and treatment of various types of organ specific diseases, vascular targeting, vaccine development, and the overall impact of Nanomedicine on advancing precision medicines. Additionally, this issue aims to cover nano nutraceuticals, nano cosmetics using single or combination of various bioactive compounds derived from natural products and impact on diseases prevention.

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPus / SciFinder*, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
