Deadline for manuscript  
submissions:

**closed (31 May 2023)**

### Message from the Guest Editor

Since the establishment of the use of animals for medical research in the mid-19th century by Claude Bernard, animal research has become an essential arena of neuroscience and experimental medicine for neurological diseases and psychiatric disorders. Currently, rodents, *Caenorhabditis elegans*, *Drosophila melanogaster*, and zebra fish are major players in the laboratory, but a growing number of other organisms are witnessed to be superior as research tools in neurosciences and behavioral sciences, such as rotifers, honeybees, locusts, sea slugs, squids, cuttlefish, turtle, and bats, among others. Developing animal models of human illnesses is a *sine qua non*, but a challenging task for translational research.

This Special Issue highlights the most recent advances in bench-to-bed translational research in the fields of neuroscience, neurology, psychiatry, and/or psychology.

We cordially invite authors to contribute original articles of laboratory or experimental medicine marking the significance of the manuscript in the last decade, review articles discussing the advancement of the specific area.

## Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
