Deadline for manuscript  
submissions:

**closed (31 August 2022)**

### Message from the Guest Editor

Dear Colleagues,

The Special Issue “Type 1 Diabetes in Women” aims to integrate basic scientific results, and particularly focus on the pathophysiology of the changes in early pregnancy, placental and fetal development, and the impact of diet, supplements and the timely titration of insulin therapy (MDI and insulin pumps), both preconception and during pregnancy. Furthermore, it is essential to discuss the impact of hypoglycemia on the course and outcome of pregnancy, advanced technologies used to improve the regulation of diabetes, and various clinical complications that occur more frequently in type 1 diabetes patients. This Special Issue is expected to provide important information, such as the development or worsening of retinopathy, neurological status, or impaired renal function, emphasizing novel therapies and the choice of modern insulins.

We would like to invite authors to present their recent research results in this Special Issue, and, in doing this, expand the knowledge of our colleagues and motivate other researchers to join us in improving care for women with type 1 diabetes mellitus.

Prof. Dr. Marina Ivanisevic

## Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within *Scopus*, *SCIE (Web of Science)*, *PubMed*, *PMC*, *CAPLus / SciFinder*, and other databases.

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (*Medicine (miscellaneous)*)
