

## Special Issue

# Oxidative Stress and Proteinopathy in Alzheimer's Disease

### Message from the Guest Editor

The multifactorial nature of Alzheimer's disease (AD) has given rise to several research debates on the early events that led to AD. Of note, interrogation of post-mortem AD brain and several neuroimaging studies has revealed accumulation and misfolding of certain proteins (prominantly amyloid beta and tau) as the important primary event playing a significant role in the initiation and progression of the disease. This is of particular relevance since this results in synaptic dysfunction and loss, leading to cognitive decline and ultimately results in neuronal cell death. An intriguing and complex relationship has been shown between A $\beta$  and mitochondrial dysfunction, redox metal imbalance, failure of protein clearance mechanism, advanced glycation end-products, and calcium excitotoxicity that may further contribute to the oxidative stress in the brains of AD patients. Understanding these interactions may thus aid in the identification of potential neuroprotective therapies that could be clinically useful.

## About the Journal

### Message from the Editor-in-Chief

*Biomedicines* (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (Medicine (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.6 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2024).
