

Special Issue

Nutraceuticals in Disease Prevention

Message from the Guest Editor

This Special Issue, “Nutraceutical Approach for Health Promotion”, will mainly focus on nutrition (minerals, vitamins, amino acids, and hormones) and food that can be used for health promotion and disease prevention. Nutraceuticals are defined as any food component for medicinal purposes. They include minerals, vitamins, amino acids, fatty acids, and hormones, in addition to foods. These are used as an alternative to conventional medicines that promote quality of life and nutritional values of foods and prolong life expectancy. Nutraceuticals can play a role in immune modulator, antioxidant, anti-inflammatory, cancer-preventive, cardioprotective, organoprotective, and detoxifying agents. The global market size of nutraceuticals is steadily increasing. It is essential that scientific evidence be provided by researchers to avoid misuse and use of products with poor evidence.

About the Journal

Message from the Editor-in-Chief

Biomedicines (ISSN 2227-9059) is an open access journal devoted to all aspects of research on human health and disease, the discovery and characterization of new therapeutic targets, therapeutic strategies, and research of naturally driven biomedicines, pharmaceuticals, and biopharmaceutical products. Topics include pathogenesis mechanisms of diseases, translational medical research, biomaterial in biomedical research, natural bioactive molecules, biologics, vaccines, gene therapies, cell-based therapies, targeted specific antibodies, recombinant therapeutic proteins, nanobiotechnology driven products, targeted therapy, bioimaging, biosensors, biomarkers, and biosimilars. The journal is open for publication of studies conducted at the basic science and preclinical research levels. We invite you to consider submitting your work to *Biomedicines*, be it original research, review articles, or developing Special Issues of current key topics.

Editor-in-Chief

Prof. Dr. Felipe Fregni

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q2 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.3 days after submission; acceptance to publication is undertaken in 3.4 days (median values for papers published in this journal in the first half of 2024).
