Research Advances on the Protein-Protein Interactions and Development of Therapeutics

Message from the Guest Editor

Several diseases are the result of aberrant protein-protein interactions involving endogenous or pathogen-derived proteins. A blockade of such undesirable interactions has proven clinical benefits and has been identified as a prime target for the drug design. Due to the flat and wide interface, some protein targets are certainly inappropriate for the development of small drug molecules; in addition, production of monoclonal antibodies against such protein molecules is expensive and challenging due to the short half-life of antibodies. In this Special Issue, we invite authors to submit their studies on protein-protein interaction and the development of therapeutics using various computational methods such as protein structure prediction, molecular docking, molecular modelling, molecular dynamics simulation, and free energy calculations. Research themes include treatments for cancer and neurological disorders, alternatives to overcome antibiotic resistance, and drugs to treat zoonotic infectious diseases.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *BioMedInformatics* (ISSN 2673-7426).

BioMedInformatics is an international, multidisciplinary, peer-reviewed and scientific open access, open source journal that encourages authors to submit high-quality original research papers and in all areas of biomedical informatics, as well as computational biology and medicine. Systematic Reviews will also be considered for publication. *BioMedInformatics* is published quarterly online by MDPI. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Dr. Alexandre G. De Brevern

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, EBSCO, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.9 days after submission; acceptance to publication is undertaken in 5.3 days (median values for papers published in this journal in the first half of 2025).
