### Message from the Guest Editors

The Special Issue entitled “Bionic Robotic Fish” will present and share recent progress and technologies in the field of bionic robotic fish. The topics may include, but are not limited to, the following:

1. Bionic robotic fish design;
2. Materials, structures, and actuators of bionic robotic fish;
3. Modeling of bionic robotic fish;
4. Advanced control of bionic robotic fish;
5. Learning methods for bionic robotic fish;
6. Sensing and perception for bionic robotic fish;
7. Autonomous navigation of bionic robotic fish;
8. Swarm robotic fish and multirobotic fish systems;
9. Applications of bionic robotic fish.

Reviews, original research, and communications are welcome.
