Message from the Guest Editors

Dear Colleagues,

The EU COST Action CA 15216, European Network of BioAdhesion (ENBA), in its efforts (i) to identify and characterize a wide range of bioadhesive systems; (ii) to evaluate bonding properties and performance from macro- down to nanoscale from different perspectives; and iii) to design artificial blueprints to test these principles in vitro, is hosting its 3rd International Conference on Biological and Biomimetic Adhesives (ICBBA 2018).

In collaboration with ENBA, this Special Issue aims to bring together the contributions of leading scientists, clinicians, engineers, and professionals at the forefront of bioadhesion science and technology; and invites all participants in the ICBBA 2018 to submit.

Prof. Alejandro Sosnik
