Message from the Guest Editor

Dear Colleagues,

I am serving as Guest Editor for the Special Issue **“The Role of Cholinesterases in Alzheimer’s Disease and Other Neurodegenerative Disorders”** in *Biomolecules* (<https://www.mdpi.com/journal/biomolecules>).

I would be pleased if you would agree to contribute a research paper or review on any aspect related to the theme of **“The Role of Cholinesterases in Alzheimer’s Disease and Other Neurodegenerative Disorders”**. Below you will find some information that you may find useful when considering this invitation.

In this Special Issue we would like to explore the various aspects of acetylcholinesterase and butyrylcholinesterase, including both enzymatic and non-enzymatic functions, to try and consolidate available information and ascertain how this focus may inform future research toward an understanding of the underlying causes of Alzheimer’s disease and other neurodegenerative disorders. In turn, this could help elucidate more effective disease-modifying and diagnostic approaches for these conditions.

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
