Message from the Guest Editors

Terpenes are very bioactive natural products. They are commonly found in extracts from plants, animals, and microorganisms, mainly in essential oils and oleoresins. The issue will share a panorama of growing research concerning the encapsulation of either terpenes or the essential oils containing them in different nanostructure systems— polymeric, lipidic, or molecular complexes— with a view to obtaining chemical protection, improved bioefficacy, and permeation-enhancing ability, among other benefits.

We welcome research and review articles focused on the biological assessment of bioactive natural products, upscaling the isolation and concentration of bioactive natural products, and formulation strategies, mainly using nanotechnological approaches.

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
