and Visual Sciences, University of
Louisville, Louisville, KY 40202,
USA

Deadline for manuscript
submissions:

closed (30 March 2024)

Message from the Guest Editor

Dear Colleagues,

We are pleased to invite you to submit reviews or manuscripts describing primary data for a Special Issue of *Biomolecules*, with the aim of providing an overview of the current state of research into the molecular mechanisms of retinal degeneration. In this Special Issue, original research articles and reviews are welcome concerning research areas including, but not limited to, the molecular and genetic causes of retinal degeneration, which can involve neurons in the neural retina or in the RPE. Molecular mechanisms in genetically, chemically or light-induced models or in vitro models leading to degeneration are applicable, taking into consideration both animal and patient data.

We look forward to receiving your contributions.

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
