Dr. Chris MacDonald Department of Biology, University of York. Heslington, UK

Deadline for manuscript submissions: closed (20 July 2023) Dear Colleagues,

The experimental tractability of yeast makes them ideal model organisms to study fundamental molecular cellular processes whose disruptions underpin human disease states. This is perhaps best exemplified by the award of Nobel Prizes in Physiology or Medicine to researchers in recognition of their work on yeast. This issue seeks to highlight work in the biomedical field that uses yeast as a model organism to study human diseases.

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
