Deadline for manuscript
submissions:

closed (30 July 2024)

Message from the Guest Editor

Dear Colleagues,

This Special Issue of *Biomolecules* aims to provide an overview of novel information and current research regarding the characterization of the human spliceosome and pre-mRNA splicing. Contributions in the form of original research papers and reviews that address the following topics are welcome: spliceosome organization, structure, and function; the regulation of RNA splicing; RNA splicing in human physiology and development; and the computational modeling of RNA splicing. However, studies related to the discovery and role of RNA splicing in disease, and technologies able to study RNA splicing and the spliceosome, are generally considered outside the scope of the *Biomolecules* journal.

Our aim is to provide a forum for investigators from around the globe to create a compendium of research efforts and advances in this fundamental area of molecular biology.

Dr. Liliana Florea

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
