Deadline for manuscript submissions:

closed (30 April 2019)

Message from the Guest Editor

Dear Colleagues,

In various psychological and pathological conditions, the role of mechanical cues, including mechanical forces, material properties of matrices and cells, geometrical confinement, fluid flow, etc., has gained increasing attention over the past three decades. Recent studies start to depict the connections between biomechanical factors and biochemical signals to elucidate the molecular machinery and mechanisms for cells to sense and respond to the complex biophysical microenvironment. This Special Issue aims to include a collection of original research and review articles that facilitate our understanding of biomechanical regulations on cell, tissue, and organ levels. We envision that these works will promote the dissemination of state-of-the-art mechanobiology research outcomes to the broad biology community, and stimulate exciting new ideas and directions.

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
