Message from the Guest Editors

Dear Colleagues,

This Special Issue titled "State-of-the-Art Molecular Reproduction in Japan" is intended to provide an innovative and broad perspective on the research in Japan in the field of molecular reproductive biology and medicine, as well as reproductive and developmental biology. We kindly encourage our colleagues in Japan involved in all fields of molecular reproduction to make contributions to this Special Issue. High-quality review articles, research articles and communications are all welcomed. The potential topics include, but are not limited to:

Reproductive biology;

Reproductive immunology;

Reproductive medicine;

Reproductive endocrinology;

Molecular regulation of reproductive processes;

Embryo development;

New techniques and methods in reproductive biology;

Gametogenesis and fertilization

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
