2. Scientist, Faculty at Columbia University Medical Center, Center for Dementia Research, Nathan Kline Institute for Psychiatric Research, Orangeburg, New York, NY, USA

Deadline for manuscript submissions:

closed (15 July 2024)

Message from the Guest Editor

This Special Issue of Biomolecules aims to present a collection of studies focusing on the most recent advancements in cannabinoid receptor structure, signaling, and function in health and disease, including developmental and adult-associated research. Authors are invited to submit cutting-edge reviews, original research articles, and meta-analyses of large existing datasets advancing the field towards a greater understanding of its fundamental and pathophysiological mechanisms. Publication topics include, but are not limited to, studies concerning epidemiology, cancer biology, neuropsychology, neurobehavior, neuropharmacology, epigenetics, genetics and genomics, brain imaging, molecular neurobiology, experimental models, and clinical investigations in the format of full-length reviews or original articles. However, other formats reduced in length could also be considered, such as brief reports, short notes, communications, or commentaries, as long as the manuscript presents innovative and perceptive content that competently suits the topic of this Special Issue.

an Open Access Journal by MDPI

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
