Message from the Guest Editors

Dear Colleagues,

The oral cavity consists of several tissue complexes with oral microbiota. In addition, oral tissues are under daily stresses, such as mastication and exposure to extraoral space. This unchangeable natural fact would make us think deeper on how oral regenerative medicine coexists with unavoidable factors. In this collection, we will present and share the current oral regenerative medicine frontiers and tasks, and we also discuss attractive tools, methods, and techniques that will be useful for future oral basic and clinical sciences.

Deadline for manuscript submissions:

closed (31 May 2021)

an Open Access Journal by MDPI

USA

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
