

## New Insight into the Molecular Genetics of Neurodevelopmental Disorders

Guest Editors:

**Dr. Luciana Musante**

Genetics Unit, Institute for Maternal and Child Health, Scientific Institute for Research, Hospitalization and Healthcare (IRCCS) Burlo Garofolo, 34137 Trieste, Italy

**Dr. Flavio Faletra**

Institute of Medical Genetics, Academic Hospital "Azienda Sanitaria Universitaria Friuli Centrale", 33100 Udine, Italy

Deadline for manuscript submissions:

**31 August 2024**

### Message from the Guest Editors

Neurodevelopmental disorders (NDDs) are a group of rare diseases mainly of genetic origin, resulting from abnormal brain development and characterized by impaired cognition, communication, adaptive functioning deficits, and impaired psychomotor skills. NDDs which include rare genetic syndromes, intellectual disability (ID), autism spectrum disorder (ASD) and epilepsy, have proven to be genetically and phenotypically heterogeneous raising unexpected difficulties to the phenotype-driven approach to diagnosis. The advances in genetic testing achieved through Next Generation Sequencing (NGS) have shown an enormous improvement in discovering genes associated with NDDs. However, interpreting the pathogenetic role of variants of unknown significance requires rigorous evaluation of multiple lines of evidence, including the functional effect of the variants at the protein, cellular, or model organism levels. With a better understanding of the molecular pathomechanisms and phenotypic spectra, patient management can be improved and targeted therapeutics may become more available.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Peter E. Nielsen

Department of Cellular and  
Molecular Medicine, Faculty of  
Health and Medical Sciences,  
University of Copenhagen,  
Blegdamsvej 3C, DK-2200  
Copenhagen, Denmark

### Prof. Dr. Lukasz Kurgan

Department of Computer  
Science, Virginia Commonwealth  
University, Richmond, VA 23284,  
USA

## Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
