### Message from the Guest Editors

The human body is host to a myriad of microbes which confer on it numerous benefits. The importance of microbes in health has come to the fore with recent studies demonstrating that alterations in specific microbes or a reduction in microbial diversity are associated with many undesirable conditions including inflammatory conditions.

In this Special Issue of *Biomolecules* called “Role of the Gut Microbiota in Immunity and Inflammatory Diseases” we would like to explore how our gut microbes influence host immunity.

## Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
