Deadline for manuscript submissions:

closed (15 February 2022)

Message from the Guest Editors

Dear Colleagues,

Proteins play a critical role in maintaining every aspect of cell survival and metabolism. The inherent dynamics of proteins in their native functional state, as well as when folding/unfolding and forming interactions, results in an ensemble of protein molecules with distinct conformational states. The dynamic conformational populations and transitions between conformational states, which have been found to be closely related to protein function and regulation, are often challenging to explore by bulk techniques. Single-molecule techniques, including both fluorescence-based and force-based approaches, have been developed as powerful tools to investigate the conformational dynamics of proteins and provide mechanistic insights into the working mechanisms of biomolecules at single-molecule resolution.

This Special Issue on “Single-Molecule Protein Dynamics” calls for manuscripts applying or developing single-molecule approaches to investigate the dynamics of the structure, folding, and interactions of proteins, furthering a deeper understanding of how proteins function in biological processes.

Message from the Editorial Board

Biomolecules is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
