Center, Houston, TX, USA

Deadline for manuscript  
submissions:

**closed (28 February 2023)**

### Message from the Guest Editor

To date, miRNAs and lncRNAs are the most extensively studied classes of ncRNAs, as they play an important role in the regulation of biological processes of cells. Aberrant expression of miRNAs and lncRNAs is often observed in cancer and they play a relevant role in the development and progression of cancer. The past decade witnessed an increasing interest in the study of miRNAs and lncRNAs as potential tumor biomarkers to predict clinical outcome and response to therapy and as potential targets for the development of RNA-based therapeutics. In particular, due to their stability in the blood (encapsulation inside macrovesicles and associated with proteins in RNA-protein complexes or high-density lipoproteins (HDLs)), particular effort has been made to develop tumor biomarkers using liquid biopsies. Furthermore, the use of RNA-based molecules may represent an important therapeutic strategy to target cancer pathways that are undruggable by standard therapies.

The aim of this Special Issue of Biomolecules is to present a collection of articles describing recent advancements in the use of ncRNAs in cancer diagnosis and therapy.

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Peter E. Nielsen

Department of Cellular and  
Molecular Medicine, Faculty of  
Health and Medical Sciences,  
University of Copenhagen,  
Blegdamsvej 3C, DK-2200  
Copenhagen, Denmark

### Prof. Dr. Lukasz Kurgan

Department of Computer  
Science, Virginia Commonwealth  
University, Richmond, VA 23284,  
USA

## Message from the Editorial Board

*Biomolecules* is a multidisciplinary open-access journal that reports on all aspects of research related to biogenic substances, from small molecules to complex polymers. We invite manuscripts of high scientific quality that pertain to the diverse aspects relevant to organic molecules, irrespective of the biological question or methodology. We aim for a competent, fair peer review and rapid publication. Please look at some of the exciting work that has been published in *Biomolecules* so far. We would be delighted to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Biochemistry)
